

Palasweet Liquid
Product Specification & Usage

Description	Palasweet is a concentrate flavour and sweetener liquid to be added to the water supply of young piglets to encourage intake
Species	Piglets up to 4 months of age
Benefits	Palasweet is formulated to provide a very attractive flavour/ sweetener for piglet drinking water. Increasing piglets water intake assists in minimising stress. Palasweet has been extensively trialled by Universities, research institutions and commercial pig farms throughout the world. Results prove Palasweet's effectiveness as an aid in the establishment of the young pig.
Inclusion Level	Not applicable
Flavour Ingredients	Aldehydes together with mixed esters, high intensity sweeteners, natural and nature identical flavour enhancers
Talin	Talin is a unique natural ingredient. Talin is utilised as a flavour enhancer, sweetener synergist and masking agent to improve performance of flavour and sweetener products in animal feed applications.
Technical Data	
Physical Appearance	: Transparent liquid
Solubility	: Water miscible
RI @ 20°C	: 1.436 + 0.005
SG @ 15.5°C	: 1.091 + 0.005
Flash Point	: >60°C
Flavour Classification	: Nature Identical
Product Classification	: Conforms to EU Regulation 1831/2003 – Flavouring Compound
Antioxidants	: None added
Shelf Life	: Best before 12 months
Storage	: In a cool dry place out of direct sunlight, Protect from frost
Flavour Profile	Palasweet has a sweet raspberry flavour and aroma
Packing Size	1000kg IBC, 25kg drums, 1 litre bottles
