Quiponin® S Powder

Description

Quiponin S Powder is a completely natural mixture of flavouring compounds, developed for use in animal feeds. The product consists of selected botanicals rich in triterpene saponins, standardized with a natural carrier.

Quiponin S Powder is a taste-enhancer. Its inclusion in animal feeds improves the palability of feeds. These effects make the animal grow faster.

Specifications

Contents	Selected botanicals rich in triterpene saponins. Main ingredient: selected milled parts of bark and branches of the soapbark tree (<i>Quillaja saponaria</i>) blended and standardized with the clay mineral sepiolite (E562) as a carrier and rapeseed-oil added as a dust reducer.
Appearance	Light-beige, free flowing powder
Stability	Minimum 12 months at room temperature
Storage	Dry, cool (below 30°)
Packing	20 kg paper bags with inner polyethylene bags

Recommended dosage

Piglets younger than 4 weeks	75 g / 1000 kg feed
Piglets older than 4 weeks	125 g / 1000 kg feed
Grower pigs and sows	100 g / 1000 kg feed
Finisher pigs	75 g / 1000 kg feed
Lambs, calves	100 g / 1000 kg feed
Broilers, turkey poults	125 g / 1000 kg feed
Layers, turkeys	75 g / 1000 kg feed
Dairy Cattle	5-10 g / head / day or 500 g/1000 kg total dry matter feed ration
Minks	125 g / 1000 kg feed
Pets	150 - 250 g / 1000 kg feed

Note: Extracts of *Quillaja saponaria* are in the EU permitted used as foaming agents in non-alcoholic beverages, under no. "E 999".

Quiponin is notified as a sensory additive according to the Community legislation (Regulation [EC] No. 1831/2003) concerning feed additives. **Quiponin** is as a natural product, approved as a flavouring and appetizing substance, according to the Council Directive 70/524/EEC..

Quiponin® is a registered trademark of Nor-Feed A/S.
