

Scan-HYG

Hygiene Disinfection powder

NEWS

Extra Absorption capacity

Scan-HYG What is it?

Scan-HYG is a dry disinfection powder to be used for all kinds of livestock.

It is non toxic and harmless for animals as well as for humans.

Used as a bedding product it has a very good absorption capacity and also has a significant effect on bacteria, such as, Staph.aureaus, Camphylobacter, Streptococcus uberis, Salmonella and coli.

Scan-HYG also prevents the heavy smell of ammonia.

How to use Scan-HYG

-Cattle: A handful per m² in the boxes or on the floor. Use 2-3 times a week.

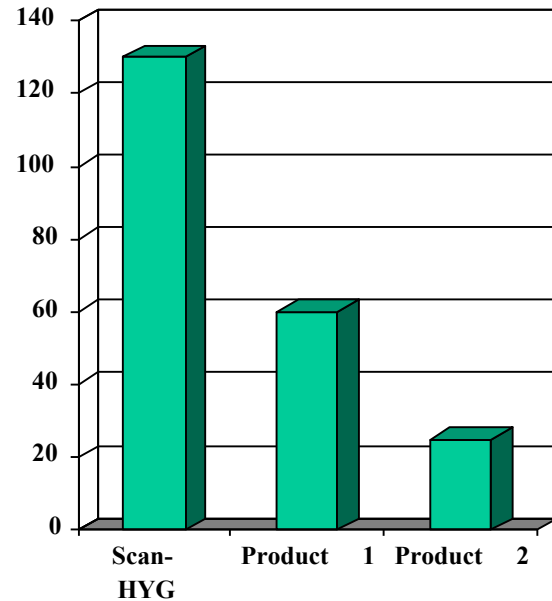

- Pigs: A handful per m² in the boxes before farrowing. After farrowing use 3 days in a row and then 3 times a week.

- Horses: A handful per m² in the boxes on the floor 3 times a week.

- Poultry: Use Scan-HYG all over the floor before bringing in the poultry. A handful per m² and then twice a week in the whole period.

Scan-HYG absorption

ml. water absorbed per 100gm product
